

NOVEMBER
15-17, 2021

INTERNATIONAL VIRTUAL SYMPOSIUM **TOWARDS URBAN SUSTAINABILITY**

The symposium aims to strengthen academic-business-government partnerships for developing sustainable urban systems that have robust resilience in the context of global environmental change. Specific objectives are to:

- Identify challenges and opportunities for achieving urban system sustainability regionally and globally
- Develop international academic-business networks to promote collaborative actions for decarbonization and sustainability
- Stimulate transdisciplinary ideas for decarbonization and sustainability projects encompassing research, education, outreach, and policy development

AGENDA

Monday, Nov. 15: Opening ceremony, Keynote Sessions & Panel Discussion

Tuesday, Nov. 16: Concurrent Workshop and Breakout Panel Discussion

Wednesday, Nov. 17: Concurrent Workshop, Breakout Panel & Closing Ceremony

SPONSORS

This symposium is supported by the National Science Foundation's Food, Energy and Water for Sustainable Urban Systems (FEWSUS) International Research Coordination Network grant, led by the University of Tennessee. For more information, visit <https://fewsus.utk.edu>
