

March 18-20, 2024

2024 FEWSUS International Symposium Food-Energy-Water Bioeconomies for Net-Zero Transition Knoxville, Tennessee, USA

The symposium will explore the contributions of the food-energy-water nexus and circularity to net-zero economy systems that make both urban and rural communities healthy and resilient to the changes of climate and demography and the degradations of natural resources and ecosystem services. The symposium will offer a transdisciplinary forum for researchers, stakeholders and students to exchange knowledge, perspectives, and practices and build collaborative teams in the following areas:

- Circular bioeconomy systems
- Circular bioeconomy systems
- Sustainability of renewable energy technologies
- Food-energy-water nexus for one-health ecosystems

AGENDA

Sunday, March 17: Arrival & Reception

Monday, March 18: Opening/concurrent sessions & breakout discussions

Tuesday, March 19: Concurrent sessions and working group meetings

Wednesday, March 20: Collaboration planning and facility tour
